

# ## W01 - Doing Things with web Things - Storage ##

Information stored or shared with user is output.

Anything coming in from the user is called input.

Input and Output = I/O, Input-Output.

Var = variable = a box to put information

var NamedItem  
↑      ↑  
Type   label of box

CSS: # refers to id selector.

ex: `<p id="big"></p>`

css: `#big { font-size: 30px; }`

• (Period) is a class selector

ex: `<h1 class="blue"></h1>`

css: `.blue { background-color: blue; }`

Google Fonts - Dosis Antonio
